Ravenwood Conference Room | Apple TV

Summary

This is a tutorial on how to connect to Apple TV in the Ravenwood Conference Room.

Prerequisites

By default, Apple TV is locked down in Kiosk mode. KitCast forces digital marketing content, so you cannot use Apple TV like normal. Please contact the IT department to unlock this for media streaming. Submit an IT support ticket or call 806-767-0418 to request assistance/access if necessary.

Instructions

1. Tap on the tabletop remote controller screen to wake it up. Selecting **Main** will provide a selection of apps. Set the interface to **Apple TV**.

2. Keep in mind that the Ravenwood lobby wall and conference room TV mirror each other. Ensure you have approval for Apple TV usage.

3. To use the Apple TV apps instead of seeing marketing material, you will need to contact IT.
