Ravenwood Conference Room | ClickShare for Windows OS

Summary

This is a tutorial on how to connect your Windows computer to ClickShare to display your screen on TV in the Ravenwood Conference Room.

Prerequisites

An adapter may be needed for dongle compatibility depending on your device.

Ensure you have permissions for external USB devices. Submit an IT support ticket or call 806-767-0418 to request assistance/access if necessary.

Instructions

1. Turn on TV. Ensure the TV source is selected to ClickShare by using the tabletop remote controller.

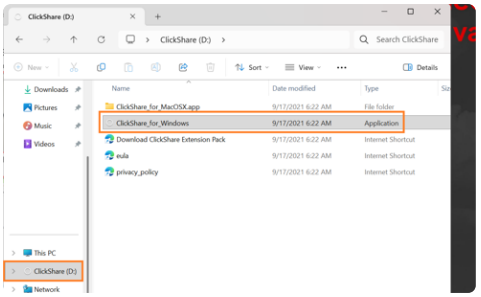

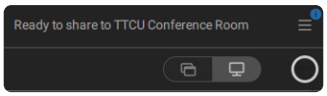

2. Connect the Barco ClickShare dongle to your USB port. Once plugged in, the circle will light up white.

3. Open “ClickShare_for_Windows” in your File Explorer to launch ClickShare.

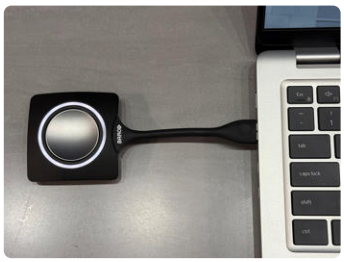

4. Ensure you see this notification on your computer screen (bottom right corner).

If ClickShare displays “Not Available” or a similar message, your computer may not have the required read/write access to USB devices. TTCU restricts USB read/write access on managed Windows computers.

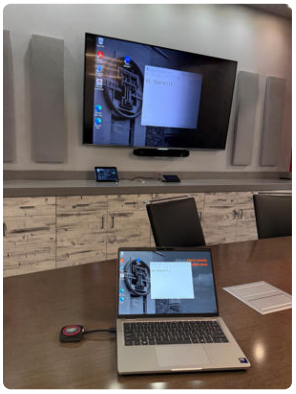

Submit an IT support ticket or call 806-767-0418 to request assistance/access.

5. Pressing the silver button will stream your computer screen to the TV. The ring will turn red.

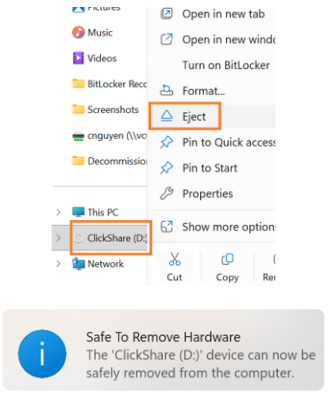

6. Your final setup should look like this:

7. Right-click the ClickShare drive and **Eject** when done.

Open in new tab
Open in new windc
Turn on BitLocker
Format...
Eject
Pin to Quick access
Pin to Start
Properties
