

• Connecting to Sonos

Reference “Main Community Room – How to use the Analog Controller” to switch to Sonos input

- Once on the correct input (will not see anything on the screens to indicate this) connect to URC network on mobile device that you will be playing music from:
 - Go to settings > Wi-Fi > TTFCU URC (contact IT for URC Password)

- Once connected, open music service of your choice (Spotify in this example):
 - Then change the output where the song should play from
 - Change to “Community Room”
