

*** Instructions are assumed a zoom meeting has already been created***

- **Security settings:**

- Click on the “Security” button on the tablet

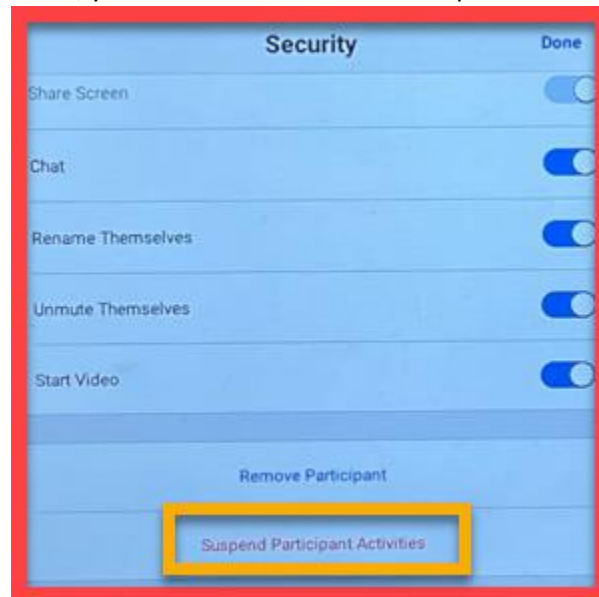

- You should get a list of all the options available:
 - You can toggle any of the options on or off at any time during the meeting, besides “Share Screen”:

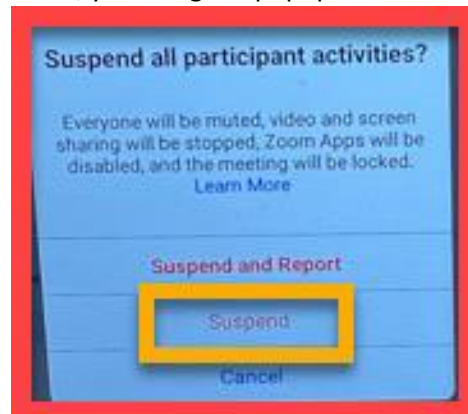

Main Community Room – Security Settings on Tablet

- From the “Security” option, you can disable all participate activities with one button.
 - Scroll down to the bottom and press the “Suspend Participant Activities” that’s in red
 - Once pressed, you will have to re-enable all options manually

- Once pressed, you will get a popup to confirm your action:

- Then you should see all the options gone but the “Share Screen” option:
